

TRUE PROP™

SOFTWARE

Performance. **Measured.**

TRUEPROP IS INDUSTRY-LEADING PROPELLER INSPECTION SOFTWARE...

TrueProp Software LLC (USA) was developed by an award winning marine software company with an extensive background in propeller design, analysis, and manufacturing. By coupling technical knowledge with extensive experience in the propeller industry, TrueProp is the next-generation solution for propeller inspection and repair.

IMPROVED PROPELLER
INSPECTION & METROLOGY
JOINT INDUSTRY PROJECT

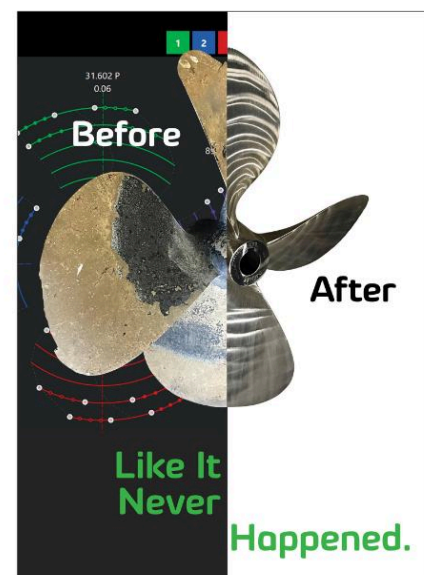

EVERYONE WANTS A QUIET, SMOOTH, FUEL EFFICIENT RIDE...

As a boat owner the value of your propeller is critical, as it is the most important component in your propulsion system. A good propeller makes a huge difference because everyone wants a quiet, smooth, and fuel efficient ride. With TrueProp, your propeller is inspected, documented and repaired to ISO Class compliances with the most sophisticated and latest technology available.

TRUEPROP PROVIDES A COMPLETE REVIEW OF YOUR PROPELLER, INCLUDING:

- Digital computerized recording of the surface of each blade
- Calculation of propeller geometry for each blade
- Overall propeller pitch, pitch of each blade, and pitch at each inspection radius
- Analysis of blade outline and blade-to-blade spacing
- Support for high-performance props, progressive-pitch, and cambered blades
- Compliance with ISO tolerance grades (Class S, 1, 2 or 3)

Performance. **Measured.**

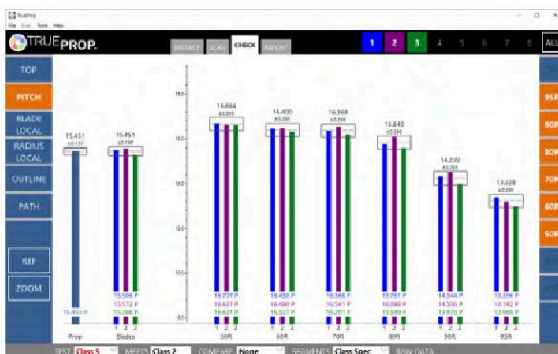

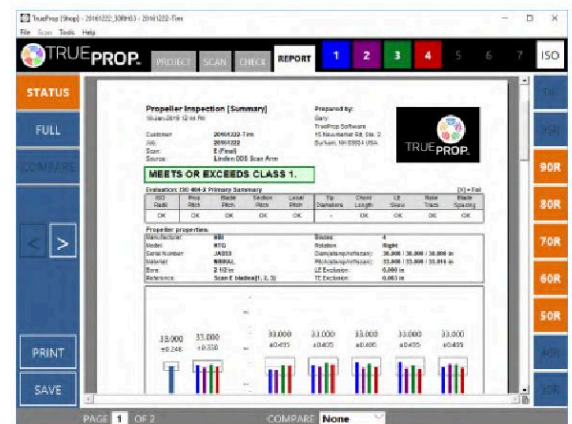

PROPELLER SHOPS USE TRUEPROP TO REPAIR AND TUNE PROPELLERS...

- Identify regions that are out of compliance
- Accurately determine repair requirements and movements
- Create and apply tuning profiles
- Improve ISO Class accuracy and performance
- Repitching propellers to improve engine load and performance
- Documentation of before and after condition
- Geometric analysis and blueprinting of propeller designs.

ACCESSIBLE PROPELLER REPORTS ARE CLEAR AND EASY TO UNDERSTAND...

Propeller inspection is all about what your propeller is, and what it should be. TrueProp is transparent; it effectively captures all of the relevant data and generates a customized report so you can easily identify the problem areas and have them corrected.

USE TRUEPROP WHEN PERFORMANCE ON THE WATER MATTERS...

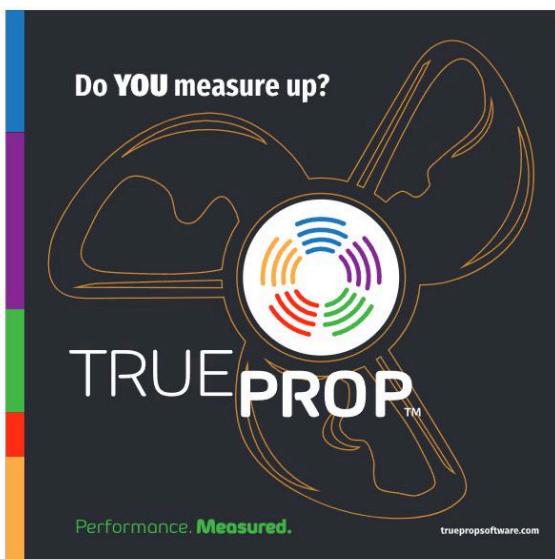

Propellers are imperfect. All propellers have blade-to-blade variation, which affects performance. TrueProp helps minimize the difference between blades, reducing vibration and propeller noise while increasing thrust and speed. The results of propeller inspection give us insight concerning propeller pitch vs performance so that your prop can be restored, improved and become more efficient.

ADVANCED TECHNOLOGY DELIVERS SIGNIFICANT VALUE FOR YOUR REPAIR...

The new age of Virtual Propeller Inspections has arrived and TrueProp Software's impressive Research and Development program keeps pace with leading technology. Full 3D scanning is the newest and most accurate method for propeller inspection and repair. Powered by TrueProp's virtual module, 3D scanning is the ideal method for in-situ propeller repairs and the preferred tool for shipyards and drydocks.

TRAINED SUPPORT FROM QUALIFIED PROFESSIONALS...

Thousands of propellers have been scanned by leading propeller shops worldwide using the industry's premier software, TrueProp. Your propeller team is backed by highly skilled and respected engineers who are readily available so your project always has the committed and dedicated support it needs.

CONFIDENCE MEANS TRUST... With TrueProp Software, your propeller is evaluated using internationally recognized ISO-484 1/2 standards and technicians are given sophisticated guidance for repairing the propeller to better than new condition. Our customers have the highest confidence in TrueProp-certified propeller repairs. You'll be back on the water in no time!

STAY TUNED FOR FUTURE NEWS AND NOTICES!

We are consistently striving to improve TrueProp and support our global customers (and our customer's customers!). Connect with us on social media to stay up-to-date about the latest in propeller inspection and repair!
